

# EIT InnoEnergy European Institute of Innovation & Technology (EIT)

## *Objective: Decarbonising Europe*

EIT InnoEnergy is spearheading the way to a decarbonised Europe by 2050 through the leadership of three industrial value chains: European Battery Alliance (EBA) for battery storage, European Green Hydrogen Acceleration Center (EGHAC) for green hydrogen, and the European Solar PV Industry Alliance (ESIA) for solar photovoltaics.

At EIT InnoEnergy, sustainability is about more than lowering emissions. True sustainability also means an industry that's commercially viable, endlessly innovative, and highly competitive. This is made possible by supporting sustainable energy innovations which provide industry with risk free, pioneering new technologies that reduce energy costs, increase system performance, decrease greenhouse gas (GHG) emissions, create jobs, and increase competitiveness.

## *Solutions*

### For Industry:

- Gain access to de-risked, commercially viable innovations
- Participate in industrial alliances in battery storage, green hydrogen and solar PV
- Access to talent and training to reskill workforce

### For innovators:

- De-risked business cases
- Access to value added services and ecosystem of investors, policy makers and corporates
- Accelerated time to market

### For students:

- Best-in-class master's in energy, innovation, entrepreneurship and digitalisation
- A head start in the labour market thanks to our network of portfolio companies and shareholders
- Travel, study and innovative at the heart of Europe's energy transition

### For the workforce:

- Online learning library with courses on batteries, hydrogen, and PV
- Providing solutions for industry, governments, distributors and universities
- Knowledge-based skills certification

## *Further Details/ Contact*
